

PURwash™

The PURwash is a combination of pressurized water and air injection which allows for extreme washing while offering the flexibility of variable dwell times. The combination of turbulent and calm zones effectively washes the product while removing fine debris that would otherwise be carried out with the product. Ideal for washing and cleaning fruit, vegetables, leafy products, tubers, roots, seafood and more.

DISCHARGE CONVEYOR

- Standard mesh belt eliminates the need for de-water conveyors
- Discharge belt options include hinged plastic belts and wire mesh belts for certain applications
- Product removal air knife included to remove product from belt while discharging

WASH ZONE

- Turbulent washing zone with pressurized water and air that creates vigorous scrubbing action
- Followed by a calm zone for settlement of fine particles that can be flushed from the system
- No mechanical parts makes it easy to sanitize

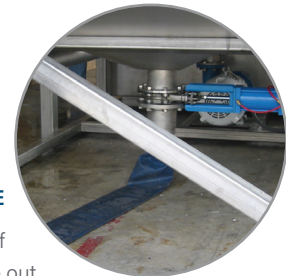

ELECTRICAL CONTROL SYSTEM

- The control panel can be customized to meet customer requirements and additions as required
- The control panel is standard NEMA 4X stainless steel and wired and plumbed to equipment devices

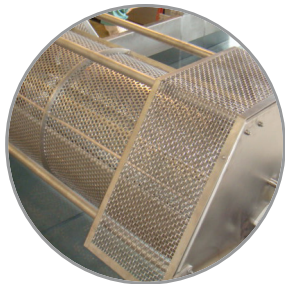

WASTE WATER DISCHARGE VALVE

- High percentage of fine particles settle out of the wash zone and can automatically be flushed from the wash system periodically
- No need to change water as frequently as conventional washing systems
- This feature helps to reduce water consumption by as much as 50%

OPTIONAL FLOATING DEBRIS AND INSECT REMOVAL SYSTEM

- Floating debris removal drum eliminates floating fines, insects and other unwanted particles as product moves through the calm zone
- Improves product quality and shelf-life
