

The MAGNEflex series, from PFI, are state-of-the-art electronic drive vibratory conveyors that use natural frequency to move dry, granular, free flowing product as well as many non-free flowing products. MAGNEflex conveyors utilize electro-magnetic drive coils without the use of moving parts or a direct connection between the drive and trough. Suited well for both food and non-food products, their sanitary design combined with the extremely flexible drive system enables these machines to fit many applications.

#### **DESIGN FEATURES**

STAINLESS STEEL OR MILD  
STEEL CONSTRUCTION

EASY TO CLEAN
