PFI is introducing the newest member to its family of products: PURlift. This conveyor is a positive-drive conveyor system that can vertically lift product, transferring it from one process to the next while minimizing the amount of floor space required.

The PURlift features an automatic in-feed section and single-drive system unique to PFI. The pneumatic belt tensioning system ensures that optimal belt tension is always maintained while acting as a quick-release take-up, allowing the unit to be cleaned and sanitized efficiently.

With sanitary design at the heart of PFI's equipment, from components to system design, the PURlift exhibits the highest in sanitary standards along with the functionality and reliability that gives confidence that you will be operating safely and efficiently.

- **POSITIVE DRIVE (SOLID URETHANE) BELT**
  - Self tracking
  - Optional motorized pulley or conventional drive with external gearbox
  - Sanitary and easy to clean

- **BELT SCRAPERS**
  - Tool-less, weighted belt scrapers on both belts
  - Reduces or eliminates product build-up
  - Easily removed and installed without the use of hardware

- **ADJUSTABLE BELT HOLD/PIVOT POINT LOCATION**
  - Easily adjustable for flexible belt spacing
  - Allows for different product types and forms to be conveyed efficiently
  - Easily accessible to make adjustments quick and easy

- **QUICK RELEASE, PNEUMATIC BELT-TENSIONING SYSTEM**
  - Increased belt life
  - Maintains correct and consistent belt tension
  - Quiet and quick operation without the use of tools

- **OPEN FRAME, STAINLESS-STEEL DESIGN**
  - Open frame, sanitary design
  - Components are easily accessible for cleaning and maintenance
  - In-feed section guarded with safety interlock device
